- 

## Experience

---

<b>Team Lead</b> <b>Lambda school</b>	<b>04/2020 to Current</b> <b>Remote, CA</b>
--	--

- Driven team to reach a 100% completion rate with monthly sprints.
- Offer guidance and technical help when a member is having a problem be it with the environment or with their code.
- Act as a liaison to the upper levels of management.

<b>Fullstack Developer</b> <b>ENCON</b>	<b>04/2020 to 06/2020</b>
--	---------------------------

- Served as a Team Lead and developer for EnCon working on both the front and back end.
- Developed front end components based on figma wire-frames using React and several libraries (React-hook-forms, React-router, Re-chart and React-calendar) to ensure functionality and feature flow.
- Created and deployed backend through heroku with PostgreSQL. I created all table and data structures as well as API to communicate with front end to store and display user info.

<b>Programmer</b> <b>IBM</b>	<b>08/2010 to 02/2013</b> <b>Essex Junction, VT</b>
---------------------------------	--

- Automated a tool to detect and identify specific product type then find registration and measurement points.
  - Responsible for assuring wafers were within engineering specifications.
  - Strong experience with technology and computers.
-
